Nouman Ejaz

FRONTEND ENGINEER

Johar Town, Lahore | +92-314-7564626 | noumanejazghost@gmail.com

Professional Summary

I'm Nouman Ejaz, skilled Frontend Engineer and UI/UX Designer. I specialize in crafting responsive, engaging, and visually appealing user interfaces that deliver exceptional user experiences. With expertise in Next.js, React, Tailwind CSS, and Redux, I build dynamic front-end applications that are both scalable and performance-driven. I've honed my expertise across various projects and roles, including as a Co-Founder at CareerTweakrz

As a UI/UX Designer, I focus on creating intuitive designs that prioritize user needs and aesthetics. My work extends to developing impactful design tools, such as Figma plugins like GlassAura and Claymorphism, which enhance the creative process for designers worldwide.

Experience

Web Developer – Exceloweb Solutions (Remote)   **2023-2024**

- Developed and managed an e-commerce platform, 3ThirstyGoats, for a US-based client, specializing in online store management and digital presence.

- Handled data entry and streamlined data workflows to ensure accurate and efficient e-commerce operations.

- Ensured website performance optimization and maintained high standards for user experience and functionality.

- Collaborated with stakeholders to align the platform's design and features with business objectives.

Frontend Engineer | UI/UX Designer – Careertweakrz Inc.   **2024-present**

- Development and design of an AI-powered SaaS platform, specializing in ATS-optimized resume generation and job search solutions.

- Frontend Engineering and later took on the responsibility of UI/UX Design, creating intuitive user experiences and interfaces for the platform.

- Designed and implemented key features using Next.js, Typescript, TailwindCSS, GraphQL, PostgreSQL, and Prisma

- Transformed design prototypes into scalable, production-ready code, ensuring seamless integration with backend services and APIs.
